Letter of Recommendation for Shobhit Vats Sharma

To Whom It May Concern,

I am pleased to recommend **Mr. Shobhit Vats Sharma**, who worked with the Knowledge Base Verification & Validation (KB V&V) team at Velsera **for approximately nine months, with his internship concluding on 27 February 2026**. In my role as Senior Manager, Knowledge-base, I directly supervised his work and closely evaluated his technical contributions, problem-solving skills, and professional conduct.

During his internship, Shobhit contributed to a structured project with two major components: **data clean-up of orthogonal curations** and the **development of an automated Comparator Analysis tool** used in KB V&V workflows. After receiving high-level requirements, he independently built a strong understanding of the scientific and validation context and translated those requirements into a functional, executable solution.

Shobhit designed and implemented a **stand-alone script** capable of running locally on any system with the required executable environment. He demonstrated strong analytical skills by converting complex validation logic into an automated comparison framework that assessed gold-set entries against system outputs and generated clear pass/fail results. Throughout development, he actively incorporated feedback from multiple rounds of User Acceptance Testing and refined the tool to handle variations in file formats, reference libraries, and permissions.

In addition to development, Shobhit showed excellent **scientific communication and documentation skills**. He authored a comprehensive user manual and conducted live demonstrations for team members, ensuring that both technical and non-technical users could confidently operate the tool. The script he developed is now actively used by KB V&V team members, reflecting both its reliability and usability.

Shobhit consistently demonstrated independence, perseverance, and a willingness to engage deeply with feedback. His ability to troubleshoot issues, explain technical concepts clearly, and deliver a practical solution within a regulated scientific

environment was particularly impressive. His contributions were recognized through extensions of his internship, underscoring the value he added to the team.

I strongly believe Shobhit possesses the intellectual curiosity, technical aptitude, and discipline required for advanced academic training. I recommend him without reservation for graduate studies or research-oriented roles, and I am confident he will excel in any rigorous academic environment.

Please feel free to contact me should you require any additional information.

Sincerely,

Gargi Nanda

Senior Manager, Knowledge-base
